

## **ECOLOGICAL PROBLEMS OF LUBRICANTS CHEMISTRY**

**O.P.Parenago**

*Institute of Petrochemical Synthesis of RAS, Moscow, Russia*

In presentation ecological problems of lubricants chemistry and additives are discussed including production, transportation, application and utilization processes. A special attention focused on content in some additives of hazard chemical elements which are not friendly to environment as well as are very unfavorable to people health. A number of examples in production of very hazard additives are given.
